DETAILED ACTION

The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 22-39 have been renumbered as 22-41 since the subsequent claim 24 on page 7 after claim 24 on page 6 were incorrectly assigned the same claims number 24, respectively. Note the marked up version of the Amendments to the Claims section of the amendment filed January 2, 2004. These are newly added claims. Further, the amendments necessitated a restriction requirement as follows:

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-14 and 22-32, drawn to a procedure for controlling a content of microorganisms in an aqueous medium.

Group II, claim(s) 15-20 and 33-41, drawn to procedure for producing hops acid.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or

Art Unit: 1651

corresponding special technical features for the following reasons: the process steps of Group I can be carried out without the process steps of Group II, therefore, a hops acid for use in a procedure for controlling a content of microorganisms in an aqueous medium does not have to be produced by the method of Group II. Further, the method of Group II does not necessarily require the same process steps of a use for controlling content of microorganisms and other steps may be employed for using the product made of Group II for controlling a content of microorganisms. There is two way distinctness between these two groups and they do not require the same technical feature(s).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
